 **WARNING:**

Store between 50°F to 104°F. Keep away from moisture. Do not leave outside. Do not drop. Keep out of reach of children.

Thank You!

Thank you for purchasing a Dab Rite Digital IR Thermometer!

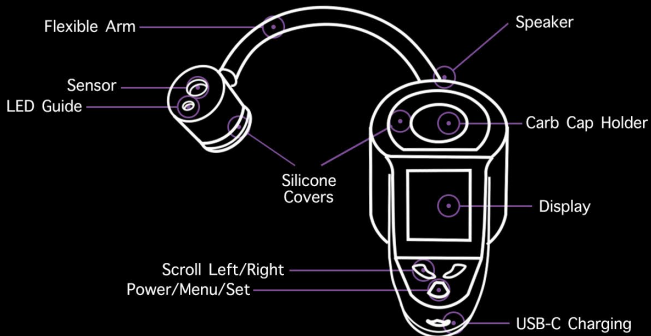

We know and understand the ritual of dabbing and set out to create a new product that not only fits aesthetically with your rigs, mat and other fine accessories, but actually provides accurate temperature readings in order to take the perfect dab.

Utilizing high grade industrial components and custom programming, the Dab Rite will alert you when the temperature you set to take your dab is reached so you no longer have to worry about reheating your banger or taking a dab that is too hot. Say goodbye to chazzed bangers and say hello to proper dabs.

It's time...to Dab Rite.

MEET THE DAB RITE

- **Store between 50 F to 104 F**
- **Keep away from moisture**
- **Do not leave outside**
- **Do not drop**
- **Keep out of reach of children**

BEFORE YOU START

1 - 2 HOURS

usb type - C

Charge your Dab Rite for 1-2 Hourse prior to first use

DISPLAY SCREENS & ICONS

Battery Level Indicator

Light Alert Indicator

Sound Alert Indicator

LED Guide Indicator

615°

Temperature Reading & Degree Scale

QUARTZ

Banger Type

SETTING THE TEMPERATURE

The Dab Rite's™ main feature is alerting you when your desired temperature is reached.

To set the temperature, press the 'menu' button once until you see the screen to the left. From here, use the left and right buttons to choose your temperature.

Once selected, press the menu/set button and use the left and right buttons to choose the temperature scale of Fahrenheit (F) or Celsius (C).

Press the menu button again to move onto the next screen.

LIGHT ALERT

When the Light Alert is on, the icon will appear on the display. When the set temperature is reached, the screen will flash for three seconds to let you know it is time to dab.

To set the Light Alert, scroll to the screen shown to the left after setting your temperature. Using the left and right buttons, turn the Light Alert on or off.

Press the menu button again to move onto the next screen.

SOUND ALERT

When the Sound Alert is on, the icon will appear on the display. When the set temperature is reached, the unit will ding for three seconds to let you know it is time to dab. When both are on, both icons appear and the unit will flash and ding simultaneously.

To set the Sound Alert, scroll to the screen shown to the left after setting your Light Alert. Using the left and right buttons, turn the Sound Alert on or off.

Press the menu button again to move onto the next screen.

BANGER TYPE

BANGER TYPE

QUARTZ

The Dab Rite™ has built-in emissivity settings that have been calibrated to quartz and opaque quartz bangers so it's easy to switch between banger types.

To set the Banger Type, scroll to the screen shown to the left after setting your Sound Alert. Using the left and right buttons, choose between quartz and opaque quartz.

Press the menu button again to exit to the main display screen.

LED GUIDE

The Dab Rite's™ sensor is equipped with an LED guide that makes it easy to know if your sensor is aligned with your banger.

To turn the guide on and off, triple click the 'right' button.

When the guide is on, the LED beam icon shown to the left will be displayed on the screen.

BATTERY LIFE AND CHARGING

The Dab Rite™ comes with a rechargeable Lithium Ion battery and has a battery icon in the upper left of the display that shows the battery's life.

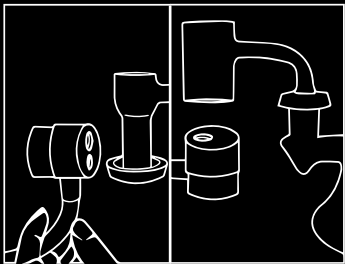

We recommend charging the device for 1-2 hours prior to the first use and again when it drops below 25%.

Plug the provided USB-C cable into the charging port to charge the unit. When the Dab Rite™ is on the battery icon will display the charge in the upper left. When the unit is powered off and charging, the charging icon will appear large on the screen as shown to the left.

 Dispose of battery according to local regulations

SENSOR PLACEMENT & USAGE

The Dab Rite™ sensor is made to measure high heat and will only display temperatures between 200°F and 800°F. Any temperature above or below those will read as “Low” or “Too Hot.”

To use, line the sensor up with either the front or bottom of your banger, depending on the style. When the LED guide light is on, the beam should align with the column on a slurper, or the edge of a bucket so the banger is centered on the sensor.

The ideal distance from the sensor to the banger is .5” or a finger width away from the front or bottom of the banger as shown to the left.

Use the flexible arm to adjust the height and position of the sensor but do not twist or pretzel the arm. The silicone cover protects the sensor, make sure it does not touch the banger to avoid damaging the sensor housing.

SUGGESTED TEMPERATURES

Vaporization temperatures can range based on several factors like concentrate type, banger type, use of terp pearls and more. The following are suggestions to be used as a starting point, but we encourage you to dial your unit in yourself based on your specific needs.

Concentrate Type	Bucket Banger	Slurper Banger
Ice Water Hash	490 - 515 F	480 - 500 F
Live Hash Rosin/Badder	500 - 550 F	480 - 535 F
Live Resin Badder	510 - 560 F	490 - 545 F
Live Resin Sauce/Diamonds	520 - 570 F	500 - 560 F

LIMITED WARRANTY INFORMATION

Dab Rite warrants the original purchaser of its products, when subjected to ordinary and intended use, will be free of defects of material and workmanship for a period of one (1) year after your purchase. Batteries have a limited warranty of six (6) months.

All warranty claims must be accompanied by a proof of purchase. Dab Rites™ are tamper evident - opening your unit for any reason will void your warranty.

If you experience a problem with your product(s) and desire to have us repair or replace it, please contact us at help@dabrite.com. All unauthorized returns will be refused for delivery. We are not responsible for items sent to us that are not in compliance with the terms of this warranty. Visit DabRite.com/warranty for full terms.

For the most current and up to date warranty information, please visit our website at www.DabRite.com/warranty.

Please Note: This device is not intended for human or animal use and should not be used to take temperatures of anything other than a banger. Dispose of unit properly as it contains a Lithium Ion battery.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device complies with part 18 of the FCC Rules.
